

STROKE INTERPROFESSIONAL COMMITTEE (IPC)

Committee Charter — Membership, Roles, and Responsibilities

The Stroke Interprofessional Committee (IPC) brings together members, roles, and responsibilities tailored to a comprehensive Stroke System of Care, ensuring coordinated, guideline-concordant, and continuously improving stroke care across the organization.

Committee Membership

Member	Role	Key Responsibilities
Medical Director, Stroke Program (Neurologist)	Chairperson	Provides clinical leadership, approves protocols, chairs committee meetings, reviews outcomes, ensures guideline compliance, oversees quality improvement.
Emergency Department Director	ED Representative	Optimizes emergency stroke recognition, triage, stroke activation, and Door-to-Needle performance.
Stroke Coordinator	Program Coordinator	Coordinates the stroke program, monitors KPIs, organizes meetings, maintains accreditation documents, conducts staff education, and follows quality initiatives.
Neurosurgeon	Neurosurgery Representative	Advises on surgical management, decompressive craniectomy, hemorrhagic stroke management, and emergency neurosurgical pathways.
Interventional Neuroradiologist / Neurointervention Specialist	Endovascular Therapy Lead	Oversees thrombectomy services, transfer pathways, EVT performance metrics, and imaging selection.
Radiology Director	Radiology Representative	Ensures rapid CT/CTA/MRI availability, reporting turnaround times, imaging protocol optimization, and staff competency.
Emergency Department Nurse Manager	Nursing Representative	Oversees nursing stroke education, triage compliance, stroke pathway implementation, and nursing quality indicators.
Stroke Unit Nurse Manager	Stroke Unit Representative	Ensures evidence-based inpatient stroke care, dysphagia screening, early mobilization, discharge planning, and nursing audits.
Intensive Care Unit Physician	Critical Care Representative	Oversees management of critically ill stroke patients, neurocritical care protocols, and ICU quality indicators.
Clinical Pharmacist	Pharmacy Representative	Develops thrombolytic medication protocols, ensures medication safety, reviews anticoagulation practices, and provides staff education.

Member	Role	Key Responsibilities
Rehabilitation Medicine Physician	Rehabilitation Lead	Coordinates early rehabilitation services and multidisciplinary rehabilitation planning.
Physical Therapist	Rehabilitation Representative	Provides mobility assessment, early mobilization, functional recovery plans, and discharge recommendations.
Occupational Therapist	Rehabilitation Representative	Evaluates activities of daily living, upper limb function, cognitive rehabilitation, and discharge needs.
Speech and Language Pathologist	Dysphagia & Communication Lead	Performs swallowing screening and assessment, communication evaluation, aspiration prevention, and rehabilitation.
Clinical Dietitian	Nutrition Representative	Manages nutritional assessment, enteral feeding recommendations, and stroke nutrition education.
Medical Social Worker	Social Services Representative	Coordinates family support, discharge planning, financial resources, and community services.
Quality Improvement Specialist	Quality Representative	Monitors KPIs, conducts audits, analyzes performance data, facilitates improvement projects, and reports outcomes.
Infection Prevention & Control Practitioner	IPC Representative	Ensures infection prevention practices within the stroke program and monitors healthcare-associated infection indicators.
EMS Representative	Prehospital Representative	Coordinates prehospital stroke identification, prenotification, transfer processes, and EMS education.
Hospital Administration Representative	Executive Sponsor	Allocates resources, supports strategic planning, removes operational barriers, and monitors program performance.

Committee Responsibilities

The Stroke Interprofessional Committee is responsible for:

- Providing governance of the Stroke Program.
- Reviewing stroke performance indicators monthly.
- Monitoring compliance with national and international stroke guidelines (e.g., AHA/ASA).
- Reviewing stroke cases, including thrombolysis and thrombectomy.
- Reviewing stroke mortality, complications, and sentinel events.
- Conducting annual review and approval of stroke policies and clinical protocols.
- Monitoring patient safety and quality improvement initiatives.
- Supporting stroke education for healthcare professionals.
- Evaluating patient satisfaction and patient experience.
- Monitoring rehabilitation outcomes and discharge planning.
- Overseeing EMS coordination and transfer pathways.
- Preparing for accreditation surveys (AHA, JCI, CBAHI, or equivalent).

Accreditation Alignment

- This committee structure aligns with the expectations for Primary or Comprehensive Stroke Center accreditation and clearly defines interdisciplinary accountability across the entire Stroke System of Care.
