

Stroke Specialty On-Call Coverage

Document ID: SU-001-ROS-01 | Parent Policy: SU-001 — Stroke Program Organization, Governance and Staffing | Version: 1.0 | Controlled Copy

Certification Alignment Note: Coverage statements must match the actual approved monthly rosters. Any gap in neurointerventional coverage requires a defined backup/transfer pathway and should not be represented as 24/7 availability if not operational.

Stroke Program — Multi-Specialty Call Schedules

This document maintains separate, current coverage schedules for each specialty service supporting the Stroke Program. Actual availability is documented on the approved roster; any coverage gap activates the defined backup/transfer pathway.

Neurointervention

- Physician roster
- Angio nurse
- Radiology technologist
- Cath lab staff
- Availability and backup/transfer status documented

Neurocritical Care

- Intensivist
- Neurologist
- ICU consultant
- Coverage schedule maintained

Vascular Surgery

- Consultant
- Backup consultant
- Availability confirmed

Interventional Radiology

- Interventional neuroradiologist
- Radiographer
- Scrub nurse
- Call activation process defined

Response Time Expectations

Service	Response Time
Neurointervention	30 minutes
Neuro ICU	Immediate
Vascular Surgery	60 minutes
Radiology	20 minutes

Attachment Required

- Attach actual monthly call schedules for each specialty listed above.
